No 212. Near the temple, Bellanthudawa, Bandaragama

PROFESSIONAL SUMMARY

Backend-focused Associate Software Engineer with 2+ years of professional experience building and maintaining production-ready backend systems using Spring Boot, NestJS, Node.js, and Laravel. Proven experience delivering live SaaS and mobile-backed applications deployed on the Google Play Store. Strong background in RESTful API development, JWT authentication, microservices, and relational/non-relational databases. Adept at collaborating with frontend and mobile teams to deliver secure, scalable solutions.

EDUCATION

WREXHAM UNIVERSITY - UK
BSc (Hons) in Computing - (In Progress)
2025 - 2026

GRADUATE DIPLOMA IN SOFTWARE ENGINEERING (GDSE)
Institute of Software Engineering (IJSE)
2022 - 2024

GCE ADVANCED LEVEL - MATHS STREAM
Vidyarathna University Collage
2020

GCE ORDINARY LEVEL
Bandaragam Central Collage
2017

SKILLS

Programming Languages

- Java
- JavaScript
- Python
- PHP
- TypeScript

Backend Frameworks & Technologies

- Spring Boot
- Node.js
- Hibernate
- Spring Framework
- Express.js
- Mongoose

Frontend (Working Knowledge)

- React
- HTML
- Next.js
- React Native
- Redux

Databases

- MySQL
- PostgreSQL
- MongoDB
- Redis

DevOps & Tools

- Docker
- Maven
- Docker Hub
- CI/CD

PROFESSIONAL EXPERIENCE

Associate Software Engineer

Aventure – Sri Lanka | Feb 2025 – Present

- Developed and maintained production backend systems using Laravel (PHP) and MySQL for enterprise SaaS and mobile applications.
- Designed and implemented secure RESTful APIs with JWT authentication, consumed by Android applications deployed on the Google Play Store.
- Built backend services for Inote and Ipanel applications, supporting real-world users and business workflows.
- Optimized database queries and backend logic to improve performance, scalability, and system reliability.
- Worked closely with React and React Native teams to deliver end-to-end features across web and mobile platforms.

Key Production Systems

- **Sivilima – Inote & Ipanel Platforms**
  Laravel (PHP), MySQL, React, React Native
  Implemented and maintained production-ready backend APIs that power mobile applications deployed on the Google Play Store, handling authentication, user management, and core business logic. Ensured secure data access using JWT-based authorization while enabling seamless integration between web platforms, mobile applications, and backend services to support reliable, real-world usage.
- **JobsNinja**
  Laravel (PHP), MySQL, React, React Native
  Designed, developed, and operated scalable microservice-based backend systems with secure RESTful APIs, focusing on performance, reliability, and seamless integration across web and mobile platforms.

Intern Software Engineer

Redcode Solutions – Sri Lanka | Feb 2024 – Jan 2025

- Contributed as a backend-focused engineer on production-level applications using NestJS and Spring Boot.
- Implemented authentication, authorization, and transaction security features across multiple systems.
- Collaborated with cross-functional teams on API design, backend logic, and frontend-backend integration.

Key Projects

- **Fishing Platform**
  NestJS, Next.js, React, MySQL
  Designed and maintained secure, scalable RESTful APIs with role-based access control to support high-traffic backend services.
- **Busy POS System**
  NestJS, React, MongoDB
  Built secure and high-performance backend services for retail transactions with strong authorization, data consistency, and performance optimization.

API, AUTHENTICATION & ARCHITECTURE

- RESTful API Development
- JWT Authentication & Authorization
- Monolithic Architecture
- Microservices Architecture
- Layered Architecture

TOOLS

- Intellij Idea
- Android Studio
- Visual Studio Code
- Windsurf IDE
- Postman
- Docker
- Figma

LANGUAGES

- Sinhala
- English

CERTIFICATIONS

- Java – LinkedIn
- MongoDB – LinkedIn
- Java Threading – LinkedIn

PROJECTS

SC Graphic Pannipitiya

- Tech Stack : Spring Boot, Spring Security, React, MySQL

The Resin art and printing site uses Spring Boot for its backend, providing robust, scalable server-side functionality and RESTful APIs for user authentication, product management, and order processing, with Spring Security integrated for secure authentication and data protection.

I Mobile Crazy Bandaragama / Kottawa

- Tech Stack : Spring Boot, Spring Security, React, MySQL

For a mobile phone buying site, the backend is powered by Spring Boot, providing robust and scalable server-side functionality. It supports the development of RESTful APIs for user authentication, product management, and order processing. With Spring Security, the application ensures secure authentication, authorization, and data protection using industry-standard practices.

Mediplus App

- Tech Stack : React Native, Google Location API

Developed a mobile application that displays nearby hospitals and Ayurvedic medical centers based on the user's location. Integrated Google Location API to provide accurate real-time positioning and mapping. Focused on delivering a smooth, user-friendly interface with reliable location-based services for enhanced accessibility to healthcare facilities.

Edu Zone LMS

- Tech Stack : MERN

Edu-Zone LMS simplifies online learning with a user-friendly platform for browsing, purchasing, and managing courses. It features interactive content, progress tracking, and certification, ensuring efficient and satisfying educational experiences tailored to modern learners.

Next Travel PVT LTD

- Tech Stack : Spring boot, Html, MySQL, Micro Service Architecture

Next Travel Pvt. Ltd. System: This is a microservice application designed to streamline the process of renting hotels, vehicles, guides, and packages. Our user-friendly platform allows customers to easily browse, book, and manage their reservations online, enhancing efficiency and customer satisfaction for Next Travel's business.

ChatGpt Terminal Bot

- Tech Stack : Spring boot

Chat Bot : This is lite version of Chatgpt. Get API key and generate this application using spring boot. It can use in CLI

MetaFlix Film Website

- Tech Stack : Spring boot, Spring Security, React, MySQL

MetaFlix : This is a film website where users can download movies. To enable movie downloads.

Personal Portfolio

- Tech Stack : React

I created a personal portfolio website using React and TypeScript. It showcases my skills, projects, and experiences with an attractive design and interactive features.

Live Chat Application

- Tech Stack : Java Socket, Java, JavaFX

This project's objective is to make a simple group chat app using a Java socket. The chat app has two parts: client and server. It has features like sending images and emojis. I used Java, JavaFX, and Java Socket for this project.

Hostel Management System

- Tech Stack : Java, JavaFX, Hibernate

A Java software using OOP principles to control the flow of fuel through a graphical user interface. This application use hibernate tool for add details to database.
